Subject Index of Volume 175

- Aggregates**
effect of muscovite on the strength and lattice preferred orientations of experimentally deformed quartz aggregates, 209
- Alloys**
microstructural interactions during flow of two-phase titanium alloys, 55
- Aluminium**
experimental textures of Al-Pb, Al-Cu and Fe-Cu metal-metal composites, 131
- Anisotropy**
a self-consistent viscoplastic model: prediction of rolling textures of anisotropic polycrystals, 71
- Augite**
dislocation-interface interactions in exsolved augite, 149
- Camphor**
self consistent modelling of the creep behavior of mixtures of camphor and octachloropropane, 231
- Ceramics**
deformation textures in hot-worked polyphase ceramics, 167
- Clusters**
clusters, plasticity and damage: a missing link?, 63
- Composites**
effects of rigid platelet additions on matrix texture and microstructural development in a model platelet-reinforced composite, 177
experimental textures of Al-Pb, Al-Cu and Fe-Cu metal-metal composites, 131
improvements on Taylor's upper bound for rigid-plastic composites, 15
texture development in Ag-Ni powder composites, 113
upper and lower bounds for non-linear composite behaviour, 7
- Copper**
experimental textures of Al-Pb, Al-Cu and Fe-Cu metal-metal composites, 131
- Creep**
self consistent modelling of the creep behavior of mixtures of camphor and octachloropropane, 231
- Crystals**
evolution of microstructure in semi-crystalline polymers under large plastic deformation, 183
- Damage**
clusters, plasticity and damage: a missing link?, 63
- Deformation**
deformation textures in hot-worked polyphase ceramics, 167
effect of muscovite on the strength and lattice preferred orientations of experimentally deformed quartz aggregates, 209
evolution of microstructure in semi-crystalline polymers under large plastic deformation, 183
experimental deformation of two-phase rock analogues, 221
high resolution electron microscopy of a deformed superalloy: shear of precipitates, 141
self-consistent methods: application to the prediction of the deformation texture of polyphase materials, 37
some typical microstructures in deformed rocks, 201
the plastic deformation of polycrystalline dolomite: comparison of experimental results with theoretical predictions, 83
- Dislocation**
dislocation-interface interactions in exsolved augite, 149
- Dolomite**
the plastic deformation of polycrystalline dolomite: comparison of experimental results with theoretical predictions, 83
- Failure**
doublet-based micromechanical approaches to yield and failure criteria, 21
- Finite element modelling**
issues in the finite element modeling of polyphase plasticity, 43
- Flow properties**
analogue experiments and numerical modelling on the relation between microgeometry and flow properties of polyphase materials, 237
- Flow rates**
microstructural interactions during flow of two-phase titanium alloys, 55
plastic flow of a two-phase solid-liquid metallic system, 159
- High resolution electron microscopy**
high resolution electron microscopy of a deformed superalloy: shear of precipitates, 141
- Hot working**
deformation textures in hot-worked polyphase ceramics, 167
- Interfaces**
dislocation-interface interactions in exsolved augite, 149
- Iron**
experimental textures of Al-Pb, Al-Cu and Fe-Cu metal-metal composites, 131
- Laminates**
strain partitioning and plastic flow in some metal/metal laminates, 125
- Lead**
experimental textures of Al-Pb, Al-Cu and Fe-Cu metal-metal composites, 131
- Loading**
complex loading of viscoplastic materials: micro-macro modelling, 31
- Macroscopic modelling**
complex loading of viscoplastic materials: micro-macro modelling, 31
- Metals**
experimental textures of Al-Pb, Al-Cu and Fe-Cu metal-metal composites, 131
plastic flow of a two-phase solid-liquid metallic system, 159
strain partitioning and plastic flow in some metal/metal laminates, 125

- Microgeometry**
analogue experiments and numerical modelling on the relation between microgeometry and flow properties of polyphase materials, 237
- Micromechanics**
doublet-based micromechanical approaches to yield and failure criteria, 21
- Microscopic modelling**
complex loading of viscoplastic materials: micro-macro modelling, 31
- Microstructure**
microstructural interactions during flow of two-phase titanium alloys, 55
- Muscovite**
effect of muscovite on the strength and lattice preferred orientations of experimentally deformed quartz aggregates, 209
- Mylonite**
the energetics of steady state heterogeneous shear in mylonitic rock, 265
- Nickel**
texture development in Ag-Ni powder composites, 113
- Non-linear behaviour**
upper and lower bounds for non-linear composite behaviour, 7
- Numerical modelling**
analogue experiments and numerical modelling on the relation between microgeometry and flow properties of polyphase materials, 237
- Octachloropropane**
self consistent modelling of the creep behavior of mixtures of camphor and octachloropropane, 231
- Phase transitions**
thermodynamics of phase transitions in swelling/shrinking surficial soil layers, 247
- Plasticity**
clusters, plasticity and damage: a missing link?, 63
evolution of microstructure in semi-crystalline polymers under large plastic deformation, 183
issues in the finite element modeling of polyphase plasticity, 43
mechanisms and models for large-strain heterogeneous plasticity, 49
plastic flow of a two-phase solid-liquid metallic system, 159
strain partitioning and plastic flow in some metal/metal laminates, 125
the plastic deformation of polycrystalline dolomite: comparison of experimental results with theoretical predictions, 83
- Platelets**
effects of rigid platelet additions on matrix texture and microstructural development in a model platelet-reinforced composite, 177
- Polycrystals**
a self-consistent viscoplastic model: prediction of rolling textures of anisotropic polycrystals, 71
the plastic deformation of polycrystalline dolomite: comparison of experimental results with theoretical predictions, 83
- Polymers**
evolution of microstructure in semi-crystalline polymers under large plastic deformation, 183
- Polyphases**
analogue experiments and numerical modelling on the relation between microgeometry and flow properties of polyphase materials, 237
deformation textures in hot-worked polyphase ceramics, 167
issues in the finite element modeling of polyphase plasticity, 43
self-consistent methods: application to the prediction of the deformation texture of polyphase materials, 37
- Powders**
texture development in Ag-Ni powder composites, 113
- Precipitates**
high resolution electron microscopy of a deformed superalloy: shear of precipitates, 141
- Quartz**
effect of muscovite on the strength and lattice preferred orientations of experimentally deformed quartz aggregates, 209
- Reinforcement**
effects of rigid platelet additions on matrix texture and microstructural development in a model platelet-reinforced composite, 177
- Rigid-plastic materials**
improvements on Taylor's upper bound for rigid-plastic composites, 15
- Rigidity**
effects of rigid platelet additions on matrix texture and microstructural development in a model platelet-reinforced composite, 177
- Rocks**
experimental deformation of two-phase rock analogues, 221
some typical microstructures in deformed rocks, 201
the energetics of steady state heterogeneous shear in mylonitic rock, 265
- Rolling textures**
a self-consistent viscoplastic model: prediction of rolling textures of anisotropic polycrystals, 71
- Shearing**
high resolution electron microscopy of a deformed superalloy: shear of precipitates, 141
the energetics of steady state heterogeneous shear in mylonitic rock, 265
- Shrinking**
thermodynamics of phase transitions in swelling/shrinking surficial soil layers, 247
- Silver**
texture development in Ag-Ni powder composites, 113
- Soil**
thermodynamics of phase transitions in swelling/shrinking surficial soil layers, 247
- Strain**
mechanisms and models for large-strain heterogeneous plasticity, 49
strain partitioning and plastic flow in some metal/metal laminates, 125
structural aspects of materials subjected to large strains, 105
- Structure**
structural aspects of materials subjected to large strains, 105
- Superalloys**
high resolution electron microscopy of a deformed superalloy: shear of precipitates, 141
- Swelling**
thermodynamics of phase transitions in swelling/shrinking surficial soil layers, 247

Taylor's bound

improvements on Taylor's upper bound for rigid-plastic composites, 15

Texture

effects of rigid platelet additions on matrix texture and microstructural development in a model platelet-reinforced composite, 177

self-consistent methods: application to the prediction of the deformation texture of polyphase materials, 37

texture development in Ag-Ni powder composites, 113

Textures

deformation textures in hot-worked polyphase ceramics, 167

Thermodynamics

thermodynamics of phase transitions in swelling/shrinking surficial soil layers, 247

Titanium

microstructural interactions during flow of two-phase titanium alloys, 55

Viscoplasticity

a self-consistent viscoplastic model: prediction of rolling textures of anisotropic polycrystals, 71

complex loading of viscoplastic materials: micro-macro modelling, 31

Yield

doublet-based micromechanical approaches to yield and failure criteria, 21
